SKATEBOARDING

URBAN SPORTS

Skateboarding is a popular sport here in Barcelona. To start, you need a skateboard.

You stand carefully on the board to ride it. When people skateboard, they do tricks. They jump and turn quickly.

The best thing about skateboarding is that

you can do it anywhere. There are special skate parks here, but a lot of people skateboard on the street.

HOCKEY

Canada is famous for the sport hockey.

The players play in

teams and move a small disc (called a 'puck') with a long stick. They try to hit the puck into a goal. You have to score goals to win.

We have hockey fields here, but kids also play it on the street and you can play it wearing skates.

SAFETY

Wear a helmet so you don't hurt yourself badly if you fall.

Don't do sport near busy roads.

Read again and complete. Talk to a friend about another sport you can do in the street.

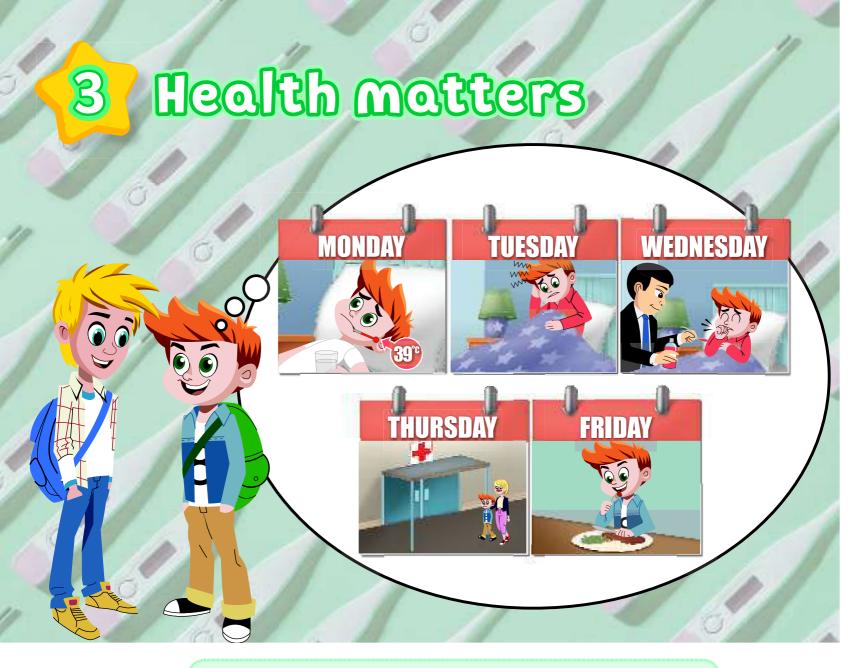

What's similar?	What's different?

Exploring our world

Simon Star

Expedition to Antarctica.

A famous explorer, Sir Ernest Shackleton, wanted to cross Antarctica. In 1914, he started the expedition, but ice closed

around the ship. They took smaller boats and made a camp on the snow. They lost their ship when it went down under the ice and water.

They couldn't move because the weather was terrible. They caught fish and drank water which they got from snow. Later, they had to eat their dogs.

Shackleton and some of his men climbed over mountains of ice, found help and went back for the other men. Everybody came home two years after the start of their expedition. They didn't cross Antarctica.

How can Istay safe outdoors?

Listen and read. What are 'dos and don'ts'?

check the weather!

Extreme heat and extreme cold can both be dangerous. Here are some 'dos and don'ts' for protecting yourself in hot and cold climates.

UV rays from the sun are dangerous and can cause sunburn. Use sun cream to protect your skin.

Without water, our bodies dehydrate. Drink lots of water to stay healthy in hot weather.

Don't eat big meals on a hot day - eat something light, like fruit or a salad, so you don't feel tired.

Wear warm clothes in cold weather, like a thick jumper, a coat, a scarf and a hat. Use thick socks and waterproof

shoes to keep your feet warm and dry.

Don't go outside with wet hair. It feels cold and uncomfortable.

Eat plenty of vegetables when the weather is cold. This will help to keep your body strong and healthy.

• How does technology help us?

1 58 Listen and read. How can technology help the environment?

Yesterday and today

In the past, people only used telephones to make phone calls. Today, we've got smartphones. They're more like small computers. We can use them to make calls, play

games, send text messages and videos, take photos, and send emails.

People printed everything in the past – books, magazines and newspapers – and everyone read on paper. Now, a lot of people read news stories on the

internet and buy e-books – electronic books

that you read on a screen. It helps the environment because we use less paper.

People listened to music on 'personal stereos' in the past. They were cassette players with headphones that people carried with them in the street. Now, people listen to music on their smartphones.

Animals are one of the most interesting things to watch and study. A lot of people think that elephants are the biggest animals in the world, but the biggest animals are blue whales. They're the longest, biggest and the loudest of all animals. They're louder than planes.

One of the smallest animals in the world is a lizard.

It's between one and two centimetres long. The quickest animal is a bird which can fly at more than 300 kilometres an hour.

The cleverest animals are humans – that's us! Some people think that monkeys are the second cleverest, but they aren't. Dolphins are cleverer than monkeys.
